The score is 68/100

Patched nvflash

This is a patched version of nvflash, an NVidia utility for modifying the BIOS (amongst many other things) on most GPUs.

However when you use (and/or modify) BIOSes with built-in bootloaders, one of those bootloaders is that the Board ID of your GPU must match any BIOS you attempt to flash to it. While the PCI Subsystem ID can be overridden, the internal board ID cannot. Essentially, the BIOS needs to have been made for your particular PCB.

For 2022/23 of users that should be the only need for nvflash, sorry.

However, advanced users may need more. See the ability to flash the BIOS below. But to make use of all that, you need more and custom...
