

USDT (ERC20) USDT (TRC20)

A Tether Mixer, also known as a Tether Tumbler is an online service helping tether owners to regain privacy over there USDT

The best way to buy cryptocurrencies such as Tethers is through a so-called "Exchange". Exchange would be used to buy Tethers using fiat cash and after verifying their identity by providing their exchange with a official ID card.

The process described as a security feature, is actually a trick from the governments forcing those exchanges to collect and share their personal information with them.

Since that date and because the aforementioned can be used by Tether to public, avoid buying your ID and be able to switch your wallet and use their own crypto to use your funds.

However, there is a legal way to purchase your crypto privacy. It's called a Tether [USDT Mixer](#).

**How does tether mixer work?**

Tether Mixer uses advanced random numbers and mix in two steps.

They will use one of their liquidity pool to receive your USDT in order to mix it with other USDT.

Then they will use another of their liquidity pool to provide you with other USDT.

Thinking that when you will receive on your new wallet after that mixing procedure will not be visible in your original blockchain.
